

Variables	Values	
What is the names of the species?	-	
Management		
Habitat management	0 = not done	1 = done
Renforcement	0 = not done	1 = done
Introduction	0 = not done	1 = done
Reintroduction	0 = not done	1 = done
Non intervention	0 = not decided	1 = decided
Land protection	0 = not added	1 = added
Life history traits & habitat		
Habitat	0 = recovery plan didn't provide information	1 = recovery plan specified the habitat
Longevity	0 = recovery plan didn't provide information	1 = recovery plan specified the longevity
Vegetative reproduction	0 = recovery plan didn't provide information	1 = recovery plan specified that the plant practices asexual reproduction or not
Dispersion	0 = recovery plan didn't provide information	1 = recovery plan specified the dispersion vectors
Reproduction event	0 = recovery plan didn't provide information	1 = recovery plan specified if the species is polycarpic or monocarpic
Pollination	0 = recovery plan didn't provide information	1 = recovery plan specified the pollination vectors
Mating system	0 = recovery plan didn't provide information	1 = recovery plan specified the mating system
Auto-incompatibility test	0 = recovery plan didn't provide information	1 = recovery plan mentionned auto-incompatibility test
Demographic		
Population size	0 = recovery plan didn't provide information	1 = Population size provided
Effective population size	0 = recovery plan didn't mention « effective population size » or in french « taille efficace »	0 = Recovery plan mentionned « effective population size » or in french « taille efficace »
Genetic		
Genetic data	0 = no use of genetic data	1 = use of genetic data
Tasks to collect genetic data	0 = absence of task to collect genetic data	1 = task to collect genetic data
Mention of genetic	0 = recovery plan didn't mention « genetic » or in french « génétique »	0 = recovery plan mentionned « genetic » in french « génétique »
